

Animals Including humans Year 5

Key Vocabulary	
Fertilisation	The process of the male and female sex cells fusing together.
Prenatal	The stage of development from the time of fertilisation to the time of birth.
Gestation	The process or time when prenatal development takes place before birth.
Reproduce	To produce young.
Asexual Reproduction	A process where one parent produces new life.
Sexual Reproduction	A process where two parents – one male and one female – are required to produce new life.
Life Cycle	The changes a living thing goes through, including reproduction.

Fertilisation: The male and female sex cells fuse together.

Prenatal: The cells develop and grow into a foetus inside the mother's uterus. After around nine months, the baby is born.

Childhood: Children learn new skills and become more independent.

Infancy: Rapid growth and development. Children learn to to and walk.

Adolescence: The body starts to change over a few years. The changes occur to enable reproduction during adulthood. Much more independent.

Late adulthood: Leading a healthy lifestyle can help to slow down the decline in fitness and health which occurs during this stage.

Early adulthood: The human body is at its peak of fitness and strength.

Middle adulthood: Ability to reproduce decreases. There may be hair loss or hair may turn grey.

Animals Including humans Year 5

Key Vocabulary	
Adolescence	The social and emotional stage of development between childhood and adulthood.
Puberty	The physical stage of development between childhood and adulthood.
Menstruation	When the female body discharges the lining of the uterus. This happens approximately once a month.
Adulthood	The stage of development when a human is fully grown and mature.
Life Expectancy	The length of time, on average, that a particular animal is expected to live.

Puberty: What Happens?

Your voice deepens.

Sweat Your armpits sweat.

Hair Hair grows on your face, arms, legs, chest, armpits, and between your legs.

Both males and females grow in all parts of the body, and their sweat glands produce more sweat.
